III. READING (2.0 pts)

PART 1: Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct word or phrase that best fits each of the numbered blanks from 21 to 25.

Projects Abroad Vietnam is a Non-Governmental Organization. Its main placements mainly focus on providing care for children with disabilities, and its main partners include Hanoi Friendship Village, Hope Center, Phuc Tue Center for intellectual disabled children, etc.

Standards of cleanliness and sanitation in care centres can often be quite poor. Many of the children that attend daycare facilities also come from low-income families where this isn't a priority. This means that the spread of infections and sickness is common. We educate and run activities to promote proper hygiene, with the aim of improving overall health in these care centres.

We aim to promote a lifestyle of proper nutrition, exercise and medical care and life skill education targeting healthy behaviour. Our health education programme also includes gender education. Volunteers are encouraged to include physical activities in their daily routines, promoting healthy foods as well as good hygiene practices.

It has been shown that a lack of stimulation in early years, particularly in situations of poverty or neglect, can lead to delayed development later in life. With that in mind, we aim to improve the emotional and cognitive development of the children we work with through regular games, activities and interaction with our volunteers, while taking care to include and offer the same level of attention to each child.

In Viet Nam, there are very limited resources made available for people with disabilities. Those with disabilities can be marginalized and have severely restricted opportunities when it comes to finding work. **This** has a huge impact on their quality of life. By providing individualized care and attention, we can give more specialized and worthwhile treatment to those who are most in need.

(Adapted from Truong Thanh's book)

Question 21. What is the main idea of the passage?

- A. Challenges faced by people with disabilities in Vietnam
- B. Efforts by Projects Abroad Vietnam to support children with disabilities
- C. The importance of physical activities for healthy development
- D. The lack of hygiene awareness in Vietnamese care centers

Question 22. The word **“This”** in the sentence *“This has a huge impact on their quality of life”* refers to _____.

- A. the limited resources available for people with disabilities
- B. the attention given to each child
- C. the games and activities offered to children
- D. the promotion of proper nutrition and exercise

Question 23. The word **“hygiene”** in paragraph 2 is CLOSEST in meaning to _____.

- A. Safety
- B. Cleanliness
- C. Nutrition
- D. exercise

Question 24. What can be inferred about children from low-income families attending these centres?

- A. They often have better hygiene practices at home.
- B. They are less likely to suffer from infections.
- C. They may face more health risks due to poor sanitation.
- D. They are encouraged to stay home instead of attending care centres.

Question 25. Which of the following is **NOT mentioned** as a part of the health education programme?

- A. Gender education
- B. Encouraging exercise
- C. Teaching children about hygiene
- D. Training teachers in special education

PART 2: Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 26 to 30.

Many people go through life only thinking about their own well-being and that of those around them. In reality, the well-being of the environment is just as important in certain ways. Without a healthy and sustainable environment, their own health and ability to leave behind a sustainable planet to those who live after them is negatively affected. Therefore, two main environmental benefits can be realised with greener living.

Firstly, people can conserve natural resources. The natural resources that man has been enjoying are beginning to disappear. Due to population growth, it is estimated that the use of natural resources has more than tripled since 1970. At that rate, it is not difficult to see how these same resources will eventually become **depleted**. It is important to conserve those precious resources so that others after this generation can enjoy the same quality of living on this planet.

Secondly, people can reduce the harmful effects of climate change. Primarily due to human's reliance on fossil fuels over the years, climate change is a real concern. People continue to release carbon dioxide into the atmosphere, further polluting the air. **This** is leading to dramatic changes in temperatures that need to be stopped. Greener living aims to do exactly that. For every person who makes an effort to reduce his or her carbon footprint in the world, climate change can begin to become less of a concern over time.
