Like many countries, Britain has serious environmental problems. In 1952, more than 4,000 people died in London because of the smog. The government introduced new laws to stop smog from coal fires and factories and the situation **improved** a lot.

Today, London is much cleaner but there is a new problem: smog from cars. In December 1991, there was very little wind in London and pollution increased. As a result, about 160 people died from pollution in just four days.

Part of the problem is the new "out of town" shopping centres. In the past, people often walked to shops near their homes or went by bus. Now, many people drive to the new shopping centres. The small shops have disappeared and more people have to travel to do their shopping.

Many people are trying to reduce the use of cars in Britain. Some cities now have special bicycle lanes, so people cycle to work. Some people also travel to work together in one car to reduce pollution and costs.

A. Choose the best answers.

1. Which of the following statements is TRUE according to the passage?

A. The government once introduced a law against smog from cars and factories.

B. London is much cleaner than before, so nobody dies from pollution any longer.

C. People in cities now go to work by bicycle only.

D. Now smog in London mainly comes from cars.

A. got worse

Lan, can you tell me about the Go Green?

Lan

Well, our club was founded in 2010 with ten members. Since then more people have joined the club and now we have about 200 members. We want to raise people's awareness about environmental issues.

R

So what do you do exactly?

Lan

Our regular activity is collecting rubbish at Hoan Kiem Lake every weekend. In addition, every three months, we organize a public campaign to attract attention from the community. This year, we organized the Walking for the Environment Day in March and a Green Fashion show in June.

R

So what are you going to do in September?

Lan

We plan to promote the Ecobag campaign in supermarkets such as Metro or Hapro.

R

Excuse me, but what is an Ecobag?

Lan

Well, an Ecobag is made from environmentally friendly materials, not a plastic one. That's an effective way to protect the environment.

R

That sounds great.
