Water is the source of all life. No plant, animal or human can live without it. Researchers say water is (25)\_\_\_\_\_ for us to live longer. They say people who drink a lot of water every day are healthier (26)\_\_\_\_\_ they live longer than people who do not drink a lot of water. People who drink a lot get fewer health (27)\_\_\_\_\_ and old-age illnesses, like heart and lung disease. Adults who do not drink enough water are more likely to die younger, and to get old quicker.

Researchers looked at data from 11,000 hospital patients over 30 years. The patients had visited a hospital at least five times - three times in their 50s, and twice aged (28)\_\_\_\_\_ 70 and 90. A researcher said: "Proper water drinking may slow down ageing and prolong a disease-free life". People should drink more water, juice, and fruit and vegetables with water in them. Half of people worldwide do not drink enough. An adult needs over 1.5 litres of water every day.

Not so many years ago, the world vitamin was known only to a few scientists. Today it is very widely used, and the importance of vitamins in our foods is common knowledge. Vitamins are life-giving substances found in foods and are needed for the proper growth and general health of the body. The different kinds of vitamins are indicated by letters of the alphabet. At the present time, vitamins A, B1, B2, C, D, E and G are known. A proper diet should contain a collection of foods in which all of these vitamins are present. Vitamins are also prepared and sold in tablet and capsule form.

Each vitamin has its particular work to do in the life-giving process. Vitamin B1, for example, benefits appetite and digestion. **It** also helps the body grow. Another vitamin helps the blood to clot, so that danger of bleeding to death in case of injury is lessened. Still another makes the eyes stronger of seeing at night. Airplane pilots need plenty of this vitamin. Scientists think vitamins may have some effect on keeping the hair from turning gray.

**Question 29.** What does the word "**it**" in paragraph 2 refer to?

- A. The body                      B. The blood                      C. Vitamin B1                      D. Vitamin

**Question 30.** What is the passage mainly about?

- A. What a proper diet should contain.                      B. How vitamins help the body grow.  
C. How to cook food.                      D. What vitamins are and what they do.

**Question 31.** According to the passage which of the following sentences is NOT true?

- A. Vitamins are found in foods.                      B. Vitamins can be prepared and sold in tablet only.  
C. Vitamins are very widely used today.                      D. Each vitamin has its particular work to do.

**Question 32.** According to the passage, how are vitamins indicated?
