

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions

Although there is not a simple answer, scientists and environmentalists are developing new ideas to address the plastic problem. Some scientists are working on developing biodegradable replacements for plastics. A group of researchers from Harvard created a plastic-like substance made from shrimp shells. In Indonesia, a company replaced plastic bags and soap wrappers with packaging made from seaweed.

Instead of engineering plastic replacements, **others** are taking on the collection of plastics in landfills and oceans. Microbiologists from Pakistan tried using mushroom enzymes to break down plastics in garbage dumps more quickly. Engineers in the Netherlands developed a nearly 2,000-foot-long ocean garbage truck, which travels the waters and collects plastics. Known as System 001, this ocean trash collector is heading to the Great Pacific Garbage Patch for some cleanup. A nonprofit organization called The Plastic Bank pays community members for plastics that they collect. By **incentivising** plastic pick-ups, The Plastic Bank prevents these materials from ending up in the ocean and recycles the collected plastics into new products. Environmentalists also recommend that citizens can take action to decrease their consumption of ever-convenient plastics. Environmentalists urge citizens to reduce their use of single-use plastics, plastics used once and then **tossed**. Worldwide, 73% of beach litter comes from single-use plastics, like plastic straws, cups, bags, and utensils, reports National Geographic.

Secondly, environmentalists encourage individuals to recycle plastics. Recycled plastics can be repurposed into new products - suitcases, furniture, new bottles, laundry detergent, and much more. But it is important to sort recyclables from trash carefully. Tom Szaky, CEO of a recycling company, said, "Typically, 50% of what you put in your recycling bin is never recycled. It's sorted and thrown out. This is partly due to user error, a common problem which occurs when people place unrecyclable materials into recycling bins."

Question 1. Which of the following could be the best title of the passage?

- A. What is the Great Pacific Garbage Patch?
- B. What can be done to solve the plastic problem?
- C. How can single-use plastics be reduced?
- D. How can plastics be recycled

Question 2. What does the word **others** on paragraph 2 refer to?

- A. Plastic replacements
- B. Scientists and environmentalists
- C. Plastics
- D. New ideas

Question 3. What does the word **incentivising** probably mean?

- A. encouraging
- B. reducing
- C. preventing
- D. ending

Question 4. The word “ **tossed** ” in paragraph 2 is opposite in meaning to _____.

- A. thrown
- B. collected
- C. burned
- D. sold

Question 5. Which of the following is NOT true according to the passage?

- A. The Plastic Bank lends people money for plastic pick-up.
- B. Mushroom enzymes were used to help plastics decompose faster.
- C. Shrimp shells and seaweed were used as plastic replacements
- D. According to the National Geographic, nearly three quarter of garbage on the beach are single-use plastics

Question 6. Who built a vehicle that collects plastics in oceans?

- A. A group of researchers from Harvard
- B. Microbiologists from Pakistan
- C. An Indonesian company
- D. Engineers in the Netherlands

Question 7. It can be inferred from the passage?

- A. System 001 has cleaned up Great Pacific Garbage Patch.
- B. Plastics that are recycled can be made into any product.
- C. The plastic problems have been successfully addressed.
- D. Half of the materials in cycling bins are unrecyclable.

Mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks

Engineers are building machinery to harness the power of ocean waves. As an abundant source of clean energy, wave power can be categorised along with (8) _____ sustainable energy sources, such as wind and solar power.

Wave power is extracted by wave energy converters, or WECs, which are placed along ocean (9) _____ that produce strong waves. The first wave farm, (10) _____ comprises three WECs, was built off the coast of Portugal in 2008. It was set to produce over two megawatts of energy – enough to power 2,000 homes. Sadly, the project hit a (11) _____ block two months into operation and has remained offline ever since, demonstrating the high probability of technical difficulties that can still arise.

Engineers are continuing to build wave farms worldwide, (12) _____ it is worth cultivating the extraction of wave power. The amount of power that could potentially be extracted is three terawatts – enough for billions of homes and businesses.

| Question 8. | A. every | B. another | C. other | D. each |
| Question 9. | A. floods | B. brooks | C. currents | D. streams |
| Question 10. | A. who | B. which | C. that | D. whom |
| Question 11. | A. tripping | B. stepping | C. rolling | D. stumbling |
| Question 12. | A. despite | B. as | C. so | D. due to |

Mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks

Louis Pasteur was a famous French scientist. He developed several important inventions in medicine, chemistry and industry. He was (13) _____ that life could come only from life. He understood that life could not just suddenly occur out of nowhere. His research proved that diseases are spread via bacteria and (14) _____. With this knowledge, humans were able to save many lives. His works greatly benefited human life.

Pasteur discovered a way to make milk, wine and foods safe. The process, known as pasteurisation, was named after him. He figured out that by heating these foods and (15) _____, they could be better preserved. The heat kills the germs that spread disease.

This research was also valuable in medicine. Pasteur was able to prove that germs in the body cause illnesses. He also discovered that animals could be resistant to certain diseases (16) _____ to the diseases in a very minute amount. (17) _____. Vaccinations keep humans from contracting certain illnesses such as rabies, smallpox and chickenpox.

Pasteur's contributions to the scientific world make him (18) _____ of all time.

Question 13.

- | | |
|---------------------------------|-----------------------------------|
| A. a first scientist believing | B. the first scientist to believe |
| C. the first scientist believed | D. a first scientist believed |

Question 14.

- A. the spread of bacteria be controlled
- B. that the spread of bacteria could be controlled
- C. what controlled the spread of bacteria
- D. controlling the spread of bacteria

Question 15.

- | | |
|---------------------------------------|---------------------------------------|
| A. freeing them from harmful bacteria | B. to free them from harmful bacteria |
| C. freeing them from bacteria harmful | D. to free them bacteria harmful |

Question 16.

- | | |
|--------------------------------|------------------------------|
| A. when they have been exposed | B. to expose |
| C. having been exposed | D. if they have been exposed |

Question 17.

- A. This paved the way for the development of vaccinations
- B. Paving the way for the development of vaccinations
- C. Which paved the way for the development of vaccinations
- D. When it paved the way for vaccination development

Question 18.

- A. to be one of the most important scientists
- B. one of the most important scientists
- C. one of the scientists most important
- D. the most important scientists

Read the following advertisement/school announcements and mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks

Join Us (19) _____ the International Cultural Festival in Hanoi!

- Explore (20) _____ cultures from around the world.
- Enjoy traditional music, dance, and food.
- Engaging (21) _____ activities for the whole family
- Cultural exhibitions showcasing global heritage
- Date: March 15th, 2024
- Place: Hanoi Cultural Center

Don't miss this vibrant celebration of diversity!

| Question 22. | A. celebrating | B. celebrate | C. have celebrated | D. be celebrated |
| Question 23. | A. stalls | B. supplies | C. carts | D. riots |
| Question 24. | A. If | B. Should | C. Were | D. Had |

Mark the letter A, B, C or D on your answer sheet to indicate the correct arrangement of the sentences to make a meaningful paragraph/letter in each of the following questions.

Question 25.

- a. Finally, I would buy a motorcycle for my sister. She has had to ride her old bicycle since she was 15.
- b. Do you think winning the lottery would make you happy? If I won it, I could do something easily.
- c. To sum up, I would use the money to help my family with the satisfaction of basic needs.
- d. Secondly, I would have our old house rebuilt. My parents, my sister and I have been living in there for more than 40 years and it is downgraded.
- e. First of all, I would donate half of the money to the orphanages in my little hometown.

- | | | | |
|--------------|--------------|--------------|--------------|
| A. a-b-c-d-e | B. b-e-a-d-c | C. b-e-d-a-c | D. b-e-c-d-a |
|--------------|--------------|--------------|--------------|

Question 26.

- a. Dear Mr. Parker,
- b. I would appreciate it if you could tell me what the entry requirements are. Could you please let me know if I need to take a test? I would also like to know the course fee and the daily wage for the apprenticeship.
- c. I look forward to receiving your reply soon.
- d. Your sincerely,
- e. I am writing to ask for more information about the tour guide training courses at the SGV Vocational School.

f. I am very interested in travelling and exploring different cultures, so I would really like to know some information about one of your courses.

- A. a – b – e – c – f – d
C. a – e – f – c – b – d

- B. a – b – e – c – d – f
D. a – e – f – b – c – d

Mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions.

Question 27. On their first day at the new school, the twins managed _____ quickly with their classmates through shared interests.

- A. bond B. to bond C. bonding D. to bonding

Question 28. Catherine II improved education for children and women, and opened the first school for girls in Russia, _____?

- A. didn't she B. didn't Catherine II
C. did not she D. did she

Question 29. He _____ his brother so much that people often confuse him with his brother

- A. takes down B. takes away C. takes after D. takes in

Question 30. Gen Xers are also known as critical thinkers because they achieved _____ levels of education than previous generations.

- A. high B. more higher C. higher D. highest

Question 31. Wilhelm Rontgen accidentally _____ X-ray radiation while he _____ in the lab.

- A. was discovering - worked B. discovered- worked
C. was discovering- was working D. discovered – was working

Mark the letter A, B, C or D on your answer sheet to indicate that it differs from the other three in the position of stress in each of the following questions.

Question 32. A. natural B. difficult C. confusing D. cultural

Question 33. A. concern B. problem C. landfill D. hero

Mark the letter A, B, C or D on your answer sheet to indicate the word whose underlined part differs from that of the other three in pronunciation in each of the following questions.

Question 34. A. custom B. costume C. cyclist D. country

Question 35. A. account B. about C. shoulder D. mountain

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions

The Japanese have one of the highest life expectancies in the world. On average, men live to be 81 and women live to be 87. How do they do it?

One reason is their diet. The traditional Japanese diet is low in fat and high in vitamins, minerals and fiber. They eat a lot of fish, vegetables, rice and soy products like tofu and edamame. These foods are all very healthy. For example, fish is a good source of omega-3 fatty acids, **which** are good for your heart. Soy products are also good for your heart because they contain **compounds** called isoflavones.

Another reason is the way they eat. They usually eat until they're only about 80% full. This is called hara hachi bu. Eating slowly is also important. It takes about 20 minutes for your brain to realise that your stomach is full. If you eat too quickly, you can eat too much before your brain tells you to stop.

Exercise is also a big part of their daily routine. Many people walk or ride a bike to work instead of driving or taking public transportation. They also take the stairs instead of the elevator. In school, students do not have a lot of time for physical education classes, so they do exercise in their classrooms between lessons. This is called rajio taiso. Many companies also do rajio taiso with their employees in the morning to help them wake up and get ready for the day.

Finally, the Japanese place a lot of importance on socialising and spending time with friends and family. They often go out for drinks and dinner with coworkers after work. They also have a lot of holidays and festivals where they can relax and have fun with their loved ones.

Question 36. Which of the following would be the best title for the passage?

- A. How the Japanese have a healthy lifestyle.
B. How the Japanese keep fit.

C. Which daily routine the Japanese prefer.

D. What the Japanese do each day.

Question 37. What does the word “**which**” in paragraph 2 refer to?

A. minerals

B. fish

C. soy products

D. omega-3 fatty acids

Question 38. The word “**compounds**” is closest in meaning to _____

A. materials

B. concentration

C. combinations

D. complexes

Question 39. How do the Japanese eat?

A. They often spend 20 minutes thinking about how to eat.

B. They only eat 80% of their meal.

C. They stop eating before being 100% full.

D. They eat slowly when their stomach is full.

Question 40. Which of the following NOT mentioned as a way the Japanese do exercise?

A. Use sets of steps between floors

B. Do physical exercise during break time

C. Go on foot or on a bicycle

D. Do *rajio taiso* after a working day

Ecotourism lacks a universally-accepted definition, but is generally regarded as responsible and (1) _____ travel to natural areas that both conserves the environment and improves the well-being of those living there. At the heart of it is the assumption that in a predominantly capitalist world (2) _____ nature plays second fiddle to creating wealth, any conservation needs to pay for itself. Money generated from ecotourism is invested back into the conservation of the environment it impacts upon.

Supporters argue that, by involving residents in accommodating tourists and acting as guides, for example, ecotourism aids development, both regionally and nationally. In (3) _____ cases, communities work as equal partners with ecotourism organisations rather than just as employees. (4) _____, some detractors point out that the environment is effectively prioritised above the needs of residents. Ecotourism's apparent obsession with this, far from giving a boost to the development of wealth in a community, can actually damage the ability of the majority of inhabitants to (5) _____ themselves out of poverty.

Question 1. A. profitable

B. livable

C. sustainable

D. renewable

Question 2. A. it

B. whom

C. who

D. where

Question 3. A. many

B. each

C. every

D. much

Question 4. A. However

B. But

C. And

D. Moreover

Question 5. A. render

B. lift

C. augment

D. remedy

Mark the letter A, B, C or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks

Going green is a popular phrase that refers to the process of making changes in your life to help protect the environment. Many people are becoming more aware of the importance of taking care of the Earth, and they are making an effort (6) _____. There are many ways that you can go green in your everyday life. One simple change you can make is to start recycling. Instead of throwing away (7) _____, you can put them in a separate bin to be recycled. Another way to go green is to reduce your water usage. You can do this by taking shorter showers and turning off the faucet (8) _____. You can also go green by using public transportation instead of driving your car. Taking the bus or the train can help to reduce air pollution and save energy. Additionally, you can choose to buy products that are made from recycled materials or produced in an environmentally friendly way. (9) _____, you can help to create a greener future. Going green is not just about making individual changes; it is also about spreading awareness and encouraging others to take action. By sharing information with (10) _____, you can inspire them to make small changes in their own lives. (11) _____.

Question 6.

- | | |
|------------------------------------|-------------------------------------|
| A. and live more sustainable lives | B. of living more sustainable lives |
| C. to live more sustainable lives | D. living more sustainable lives |

Question 7.

- A. items like plastic bottles and aluminium cans
- B. items plastic bottles like aluminium cans
- C. like plastic bottles and aluminium cans items
- D. like items plastic bottles and aluminium cans

Question 8.

- | | |
|-----------------------------|-------------------------------|
| A. to brush your teeth | B. while you brush your teeth |
| C. and you brush your teeth | D. brushing your teeth |

Question 9.

- A. When you support companies that are committed to sustainability
- B. By supporting companies that are committed to sustainability
- C. When supporting companies that are committed to sustainability
- D. Supporting companies that are committed to sustainability

Question 10.

- | | |
|-----------------------------|-----------------------------|
| A. your friends and family | B. our friends and family |
| C. their friends and family | D. those friends and family |

Question 11.

- A. Together, we can all work towards a healthier, more sustainable planet.
- B. In fact, we can all work towards a healthier, more sustainable planet.
- C. However, we can all work towards a healthier, more sustainable planet.
- D. Furthermore, we can all work towards a healthier, more sustainable planet.

Mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions.

Question 12. We have just learned that viruses are usually much _____ than bacteria.

- | | | | |
|----------|------------|-------------|-----------------|
| A. small | B. smaller | C. smallest | D. more smaller |
|----------|------------|-------------|-----------------|

Question 13. The children _____ some traditional games at the international Cultural Festival when their mother _____ them to come back home.

- | | |
|-------------------------|-----------------------------|
| A. were playing – asked | B. had been playing – asked |
| C. played – asked | D. played- was asking |

Question 14. Walt Disney produced successful animated films such as Snow White and the Seven Dwarfs, _____?

- | | |
|---------------|-----------------------|
| A. did not he | B. didn't he |
| C. did he | D. didn't Walt Disney |

Question 15. After years of consideration, the couple decided _____ a child from the local orphanage.

- | | | | |
|-------------|-------------|----------------|----------|
| A. to adopt | B. adopting | C. to adopting | D. adopt |
|-------------|-------------|----------------|----------|

Question 16. It's not right to _____ someone just because they come from a different cultural background.

A. look forward to

B. look down on

C. look back on

D. look in on

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions

In our modern world, we're facing a significant issue with too much electronic waste. Consider all the gadgets we use every day, like phones, computers, and kitchen appliances. When they're no longer useful, they often end up as trash.

The problem is, these gadgets contain harmful **substances** like lead and mercury. When they're thrown away, they can leak into the environment and make things unhealthy for people and animals. Plus, getting rid of all this electronic waste adds to pollution and worsens global warming. To address this, we need to take a few steps. Companies should make gadgets **that** last longer and are easier to recycle. We should also try to buy fewer new gadgets and reuse what we have. And it's important to recycle old electronics properly instead of simply throwing them away.

Everyone, from regular people to big companies and governments, needs to work together on this. By being more careful with our electronics and finding better ways to deal with old gadgets, we can make the world a cleaner and safer place for everyone.

Question 17. The passage is mainly about _____?

A. Strategies to reduce and manage electronic waste.

B. The growing problem of electronic waste in modern society.

C. The environmental impact of discarded electronic devices.

D. The benefits of technological advancements in daily life.

Question 18. The word "**substances**" is closest in meaning to _____.

A. neglect

B. concern

C. attention

D. matter

Question 19. The word "**that**" in paragraph 2 refers to _____.

A. gadgets

B. companies

C. reuse

D. a few steps

Question 20. According to the passage, proper recycling of electronic waste can _____.

A. reduce environmental harm

B. make everything worse than before

C. be useful

D. make the world a safer place for human

Question 21. according to the passage, all of the following are true, **EXCEPT** _____?

A. companies should design products with longevity and recyclability in mind.

B. electronic waste contains materials like lead and mercury.

C. improper disposal of electronic waste contributes to pollution.

D. recycling old electronics is a simple and straightforward process.

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions

Plastic bags are used by everybody. From a vegetable vendor to a designer store, everyone seems to use them. Even though they are one of the modern conveniences that we seem to be unable to do without, they are responsible for causing pollution, killing wildlife, and using up the precious resources of the Earth. But, most of us are blissfully unaware of the **repercussions** that are occurring and will take place in the future because of the plastic bags.

Every once in a while, the government passes out an order banning store owners from providing plastic bags to customers for carrying their purchases, with little lasting effect. Plastic bags are very popular with both retailers as well as consumers because they are cheap, strong, lightweight, functional, as well as a hygienic means of carrying food as well as other goods. About a hundred billion plastic bags are used every year in the U.S. alone. And then, when one considers the huge economies and populations of India, China, Europe, and other parts of the world, the numbers can be staggering. The problem is further exacerbated by the developed countries shipping off their plastic waste to developing countries like India.

Once they are used, most bags go into landfills. Each year, more and more bags are ending up littering the environment. Once they become litter, plastic bags find their way into our waterways, parks, beaches, and streets. And, if they are burned, they infuse the air with toxic fumes. About 100,000 animals, such as dolphins, turtles, whales, penguins are killed every year due to these bags. Many animals ingest

plastic bags, mistaking them for food, and therefore, die. And worse, the ingested plastic bag remains **intact** even after the death and decomposition of the animal. Thus, it lies around in the landscape where another victim may ingest it. One of the worst environmental effects is that they are non-biodegradable. The decomposition takes about 400 years. No one will live so long to witness the decomposition of plastic!

Thus, save the environment for the future generations as well as animals.

Petroleum products are diminishing and getting more expensive by the day, since we have used this nonrenewable resource increasingly. And to make plastic, about 60-100 million barrels of oil are needed every year around the world. Surely, this precious resource should not be wasted on producing plastic bags, should it? Petroleum is vital for our modern way of life. **It** is necessary for our energy requirements - for our factories, transportation, heating, lighting, and so on. Without viable alternative sources of energy yet on the horizon, if the supply of petroleum were to be turned off, it would lead to practically the entire world grinding to a halt. So, what can be done? A tote bag can make a good substitute for carrying groceries and the shopping. You can keep the big with the cashier, and then put your purchases into it instead of the usual plastic bag. Recycling the bags you already have is another good idea. These can come into use for various purposes, like holding your garbage, instead of purchasing new ones. While governments may be working out ways to lessen the impact of plastic bags on the environment; however, each of us should shoulder some of the responsibility for this problem, which ultimately harms us. Plastics are not only non-biodegradable, but are one of the major pollutants of the sea. For a clean and green environment, try to use alternatives to plastic whenever and wherever possible. Cut down your use of plastic, and do your bit to save our planet.

(Source: <https://www.nbcnews.com/>)

Question 22. Which of the following could be the best title of the passage?

- A. The Expensive and Diminishing Petroleum Products: A Call for Action
- B. Plastic Bags: A Major Environmental Concern and the Importance of Reduction
- C. Recycling and Reusing Plastic Bags: A Step towards a Cleaner Planet
- D. The Vital Role of Petroleum in Modern Life and the Need for Alternatives

Question 23. The word **repercussions** in paragraph 1 is closest in meaning to _____.

- A. benefits
- B. consequences
- C. explanations
- D. solutions

Question 24. According to second paragraph, what is NOT TRUE about plastic bags?

- A. Plastic bags are a major pollutant of the sea.
- B. Plastic bags have a minimal impact on the environment.
- C. Plastic bags are non-biodegradable.
- D. Plastic bags contribute to environmental harm.

Question 25. The plastic bags have negative effects, EXCEPT _____.

- A. Being non-biodegradable
- B. Harming the environment
- C. Contributing to pollution of the sea
- D. Increasing the cost of petroleum products

Question 26. The word **"intact"** in paragraph 3 is opposite in meaning to _____.

- A. harmless
- B. in ruins
- C. undamaged
- D. dangerous

Question 27. What does the word **"it"** in the last paragraph refer to?

- A. the shopping
- B. the petroleum
- C. a good substitute
- D. the bag

Question 28. It can be inferred from paragraph 4 that _____.

- A. The passage encourages reducing the use of plastic bags and promoting recycling as a solution to the plastic waste issue.
- B. Recycling plastic bags is the only solution to the plastic waste problem.
- C. Governments are solely responsible for finding alternatives to plastic bags and lessening the impact of plastic bags on the environment
- D. Tote bags are more expensive than plastic bags, but good substitutes for carrying groceries and the shopping

Mark the letter A, B, C or D on your answer sheet to indicate that it differs from the other three in the position of stress in each of the following questions.

Question 29. A. invention B. enemy C. military D. visitor

Question 30. A. pumpkin B. compost C. program D. bamboo

Mark the letter A, B, C or D on your answer sheet to indicate the correct arrangement of the sentences to make a meaningful paragraph/letter in each of the following questions.

Question 31.

- a. To sum up, having a good diet, doing exercise and taking enough sleep will help us keep our body healthy.
- b. Health is always the most valuable thing in our life, so it is very important to keep fit. There are many ways to stay healthy.
- c. Secondly, doing regular exercise is also a good way to have a good health. For instance, we can do some physical exercise such as jogging or swimming.
- d. First of all, we should have a balanced diet. For example, we had better eat more vegetables, fruits and avoid fast food.
- e. Finally, we should take enough sleep. We should sleep at least six hours a day because it helps us feel better in the next morning. Especially, do not go to bed late or watch TV overnight.

A. b-d-c-e-a B. b-d-e-c-a C. d-c-e-b-a D. b-c-d-e-a

Question 32.

- a. Dear Sir /Madam,
- b. Could you please send me details of the competition, the number of participants, entry procedures, venue, date and time? Please provide me with your phone number and email.
- c. I read the information about the English Speaking Competition on your Language Centre's website.
- d. I look forward to hearing from you soon.
- e. Your faithfully,
- f. I am interested in practising English with native speakers and I want to get some information about the competition.

A. e-c-f- b-d-a B. a-f-c- b-d-e C. c-a-f- b-d-e D. a-c-f- b-d-e

Mark the letter A, B, C or D on your answer sheet to indicate the word whose underlined part differs from that of the other three in pronunciation in each of the following questions.

Question 33. A. cuisine B. resign C. inside D. admire

Question 34. A. childhood B. challenge C. schooling D. achieve
