SECTION III: READING

Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the following questions from 22 to 26.

During your last years of high school, it's likely you'll be **confronted** with two choices in regards to further education: vocational education and higher education. While higher education, also known as tertiary education, is the more common path to go down, vocational education and training is a good alternative if you find that academia isn't your strong suit.

Some people believe that those who choose vocational training will mean that you're less likely to find a high-paying job. This is incorrect. For students, vocational training is a way to find a job that can offer an income just as high as any university graduate position - sometimes even higher. However, this obviously depends on which area you decide to go in. In fact, the labour market shows that there is a high demand for technicians and people in the trade, since most high school graduates go towards higher education institutions. In contrast, the number of people who go into vocational training has remained steady for the past twenty years.

The courses in vocational training are generally shorter than university courses. Typically, associate degrees take about two years full-time. It can even take as little as a year to complete. Because of this, vocational students spend less money on their education than university students, who spend four years on a bachelor's degree on average.

These courses also provide you with onsite training, which will give you the experience employers crave. A common complaint among university graduates is that they can't find jobs because **they** don't have any experience yet. With vocational training, you don't have to worry

Question 22: What would be the best title for the passage?

- A.** The Global Impact of Vocational Education
- B.** The Advantages of Vocational Training
- C.** The Misconceptions Surrounding Vocational Education
- D.** How to Apply for Vocational Courses

Question 23: The word “confronted” in paragraph 1 is CLOSEST in meaning to _____.

- A.** seen **B.** defined **C.** ignored **D.** encountered

Question 24: The word “they” in paragraph 4 refers to

- A.** jobs **B.** graduates **C.** employers **D.** courses

Question 25: Why does the passage suggest that vocational graduates have a higher employability rate?

- A.** because they receive higher salaries than university graduates
B. because they have more academic qualifications than university graduates
C. because they can start working immediately without additional training
D. because they are more experienced than university graduates

Question 26: Which can be inferred from the passage?

- A.** People commonly choose to pursue higher education.
- B.** People who choose vocational training cannot earn as much as university graduates.
- C.** The number of people who go into vocational training has declined for the past two decades.
- D.** University graduates can find jobs immediately even though they do not have experience.

Read the following passage and mark the letter A, B, C or D to indicate the correct option that best fits each of the numbered blanks from 27 to 31.

In 2015 Doreetha Daniels received her associate degree in social sciences from College of the Canyons, in Santa Clarita, California. But Daniels wasn't a typical student: She was 99 years old. In the COC press release about her graduation, Daniels indicated that she wanted to get her degree simply to better herself; (27) _____ during that pursuit were a testament to her will, determination, and commitment to learning.

Few of us will pursue college degrees as nonagenarians, or even as mid-career professionals (though recent statistics indicate that increasing numbers of people are pursuing college degrees at advanced ages). Some people never really liked school in the first place, sitting still at a desk for hours on end or suffering through (28) _____. And almost all of us have limits on our time and finances – due to kids, social organisations, work, and more - (29)

As we age, though, learning isn't simply about earning degrees or attending (30) _____. Books, online courses, MOOCs, professional development programs, podcasts, and other resources have never been more abundant or accessible, (31) _____. Every day, each of us is offered the opportunity to pursue intellectual development in ways that are tailored to our learning style.
