PROTECTING OUR PLANET

Environmental pollution is one of the most serious problems facing the world today. It affects the air we breathe, the water we drink, and the land we live on. To protect our planet, every individual needs to take responsibility for their daily actions.

First, reducing waste is a great way to help the environment. Instead of throwing everything away, we should practice the “3Rs”: Reduce, Reuse and Recycle. For example, using reusable bags instead of plastic ones can significantly decrease **contamination**. This dirty state of the environment harms many wild animals and their habitats. By making small changes in our shopping habits, we can contribute to a cleaner world.

Second, saving energy is also essential. Many people leave lights and electronic devices on when they are not using them. **They** should turn off these appliances to save electricity and reduce the amount of carbon dioxide released into the atmosphere. This not only helps the Earth but also reduces your monthly bills.

Finally, planting more trees is a simple but effective solution. Trees provide us with oxygen and help cool down the Earth's temperature. If we all join hands to protect the environment today, we can ensure a green and healthy future for the next generations.
