PART 3: READING (1.0 PT.)

Read the following passage and write the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions.

Carbon footprint is one of the main contributors to global warming. As mentioned in the media, members of the public are widely advised to reduce their carbon footprint and the specific steps to cut it down can be followed easily.

First, carbon dioxide is largely emitted from fossil fuel combustion in transportation, so people can shift away from petro used cars to eco-friendly vehicles running on electricity or clean ethanol. Driving less is another way to lessen a significant amount of exhaust fumes. It's encouraged to ride electric bikes to work in short distances and take a train or a bus for long journeys. Second, lowering energy waste at home can make a big difference. Considering household appliances like lights or TVs, when **they** are not in use, homeowners should switch off them and better to remove their plugs from the sockets due to saving more energy. According to a report, homeowners can save between \$100 and \$200 each year by doing so. In addition, it's wasteful to set your fridge and freezer temperatures lower than necessary, staying between 35° and 38°F to keep fresh food and 0 degrees for freezers. Last but not least, about 268 million tons of trash a year is produced by the U.S. Reducing energy consumption by recycling, therefore, can helps slash substantially greenhouse gas emissions. Besides, shoppers should take reusable bags or canvas to the stores and avoid single-use containers.

In short, through these simple tips and concerted efforts, this environmental issue is no longer pressing.

- What is the passage mainly about?
A. Easy ways to reduce the negative impacts of global warming.
B. Carbon emissions originating from the households.
C. Intelligent ways to consume environmentally friendly products.
D. Certain tips to lower people's carbon footprint.
- What does the word "**they**" in line 8 mean?
A. Sockets.
B. Homeowners.
C. Household appliances.
D. Sources of energy.
- According to the passage, why should people choose to use more green vehicles?
A. To contribute to the reduction in exhaust fumes.
B. To help reduce traffic congestion in the rush hour.
C. To lower the cost of energy.
D. To ensure their safety when travelling in long distances.
- Which of the following statements is **NOT** given in the passage?
A. The ideal temperatures to keep food fresh in the fridge.
B. The amount of trash generated by Americans.
C. The prices of reusable bags or bottles.

D. The amount of money people can save when turning off household appliances.
