Wind is a form of solar energy. Winds are caused by the uneven heating of the atmosphere by the sun. Wind flow patterns are changed by the earth's terrain, bodies of water, and vegetative cover. This wind flow, or motion energy, when "harvested" by modern wind turbines, can be used to generate electricity.

Wind turbines are available in a *variety* of sizes, and therefore power ratings. The largest machine has blades that span more than the length of a football field, stands 20 building stories high, and produces enough electricity to power 1,400 homes. A small home-sized wind machine has rotors between 8 and 25 feet in diameter and stands upwards of 30 feet, and can supply the power needs of an all-electric home or small business, utilityscale turbines range in size from 50 to 750 kilowatts. Single small turbines, below 50 kilowatts, are used for homes, telecommunications dishes, or water pumping.

21) Which of the following is NOT mentioned as a factor affecting the wind direction?

TAPESCRIPTS

Last summer holiday my family went back to the UK and we went to a music festival on the Isle of Wight. It is one of the most famous music festivals in our country, which takes place every June. When we got there, I was impressed by the huge number of people. You know about sixty thousand people went to the event. We didn't stay at a hotel but put up a tent in the camp site. It was lots of fun. We listened to a lot of songs by many bands such as The Killers and The Stone Roses. Guess what? We met Jon Bon Jovi! He's my dad's favourite singer. He and his band stirred up the crowd in nearly three hours with the hit songs. We also went to the Bohemian Woods, a beautiful woodland down by the river. There we enjoyed a mix of good music from around the world and escaped the busy and noisy festival for a while.

TAPESCRIPTS

Trung: What do you think about the traffic in Ho Chi Minh City, Alisa?

Alisa: Well, honestly, it has a few problems. As an exchange student living here for half a year, I'm not used to travelling in the streets.

Trung: Could you explain it clearly?

Alisa: You know, there are a huge number of vehicles running so fast every minute, so I find it dangerous to go cycling or cross the streets in the rush hour.

Trung: Yes, I also think that traffic congestion here is a complicated problem, especially in the rainy season.

Alisa: I totally agree. Although I can take a bus to school, it usually takes me a lot of time to wait for it, so it's really uncomfortable to get wet at the bus stop when it rains hard.

Trung: Oh, I see. Do you have any suggestions to solve this issue?

Alisa: It's hard to say, but I think the city authorities should widen the streets as well as build a modern underground system.

Trung: Couldn't agree more!
