Have you ever wondered what the weather is like in other places around the world? Today, I'd like to talk about the changing seasons in my city. The winter season usually begins in December

and ends in early March. The coldest month is January, and temperatures can drop below freezing for most of this month. The city usually averages about 30 inches of snow during this 3-month period. Occasionally, we have snow storms that can drop a foot of snow in a very short period of time. Spring usually arrives in late March, it's a beautiful season because the flowers start to bloom. It is sometimes windy, and this is great for flying kites. People in my city often like to go on picnics, stroll through parks, and play outdoor games. Summer starts in June and it's very dry with little rain throughout the season. Fortunately, the weather is very dry with low humidity, so it is real pleasant even on hot days. 1. Read the passage and answer the questions. Circle A, B, or C.

The Moon is approximately 384,400 kilometers from the Earth. Its diameter is 3,479 kilometers, about 1/4 the diameter of Earth. The average temperature on the surface of the Moon during the day is 107°C, hot enough to boil water on Earth. During the night, the average temperature drops to -153°C. Because of **its** smaller size and mass, the gravity of the Moon is about 1/6 the gravity on the Earth. That means that a person who weighs 180 pounds on Earth would only weigh 30 pounds if measured on the Moon.

The force of gravity from the Moon affects Earth. Its gravity reaches Earth and pulls the oceans toward the Moon, causing the tides. The gravity from the Sun also affects the tides. The highest tides will always occur when the Moon and Sun are **aligned**. That is when there is a New Moon or a Full Moon.

1. What is the first paragraph mainly about?
 - A. A comparison between the Moon and Earth
 - B. Physical characteristics of the Moon
 - C. The effect of the Moon on Earth
2. The word “**its**” in paragraph 2 refers to which of the following?
 - A. the Moon’s

3. According to the passage, which of the following is true?
 - A. A person would lose 5/ 6 of their weight if they were on the Moon.
 - B. A person would weigh much less on the Moon than on Earth.
 - C. The Earth weighs six times as much as the Moon.
4. What can we learn about the tides?
 - A. They happen twice a month at New Moon and Full Moon.
 - B. The Sun causes higher tides on Earth than the Moon does.
 - C. They are caused by both the Sun and the Moon.
5. The word “**aligned**” is closest in meaning to which of the following?
 - A. combined together
 - B. arranged in a line
 - C. affected by the other

2. Read the passage about computers. Decide if the statements are true (T) or false (F). Circle T or F.

Do you own a PDA – Personal Digital Assistant? Have you got a personal computer? Have you ever used a laptop? The answer can be “Yes”. But do you know that the first computer was made about 70 years ago? It was large enough to take up a living room. It was named ENIAC – Electronic Numerical Integrator and Calculator. Thanks to the development of technology, computers become smaller and smaller. The first personal computer was actually introduced in the 1970s by MITS, Apple Computer and IBM. They didn’t look exactly like now but they were surely revolutionary at the time. Scientists are finding ways to make computers as smaller and slimmer as possible. Some of the today computers are small enough to carry out in pockets. But technology doesn’t stop there. They will continue to bring out smaller computers. Who knows? Maybe one day we will not need the big desktops or laptops. We may need a computer chip that is as small as a fingernail.

1. The first computer was made 70 years ago.
2. The ENIAC was small enough to carry around.
3. MITS, Apple Computer and IBM were the first to introduce personal computers.
4. Today computers are not as small and slim as the previous ones.

How are you? I must write to tell you about the natural disaster I saw on TV this morning. It was a huge tsunami in Japan two days ago. At first, there was a very strong earthquake, and then the tsunami swept through the coastal areas of northern Japan.

It was so devastating. What used to be busy and lively cities now has become a vast area of debris. Houses were totally destroyed, and pieces of furniture and means of transport were scattered everywhere. Luckily, thanks to early warning, there was no human loss. I felt terrible. I intend to donate some of my pocket money to help the Japanese people. Would you like to join me?
